DETAILED ACTION

Information Disclosure Statement

The IDSes filed 2/9/04, 9/4/03 and 7/28/03 have all been considered and placed of record. The initialed copies are attached herewith.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Cargin, Jr. et al. (US 6,023,147). The reference discloses a battery pack for powering a communication probe such as a radio having, inter alia, a diagnostic device connected to the communication probe and the battery. A switch is used to coupled the battery to

the radio based on the state of the diagnostic device. The batteries are made up of different kinds.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 3 and 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cargin, Jr. et al. (US 6,023,147). The reference does not disclose a watchdog timer or an optical communication probe. It is a common knowledge in the art to have provided a watchdog timer for the purpose of saving battery charge whenever the

Art Unit: 2838

device is not being used. It would have been obvious to one having ordinary skill in the art to have used a watchdog timer in order to safely conserve power whenever the device is not active. It would also have been obvious to one having ordinary skill in the art at the time the invention was made to have applied the device to an optical communication probe in place of the radio probe, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.
